---

The attached document describes the technical details of Bruce Hope's stormwater model. Feel free to distribute it to interested parties, BUT, in order to minimize the amount of time Bruce spends explaining his work to a variety of people, please ask your reviewers to refrain from swamping Bruce with phone calls.

Instead - let me know who is going to be reviewing the document so I can organize a time and place to bring the technical folks together (if necessary) to have a group Q&A session. In addition to saving time, this also creates an environment for constructive group discussion and learning.

He has not pulled the electronic data files together in a format that can be shared yet. If anyone needs those, let us know and he should be able to copy those on to a disk.

Thanks

Karen
